

Exploiting Global Corporate Knowledge

Connecting employee questions with instant answers

Employees across multiple sites waste time looking for information to do their jobs, with company knowledge repositories failing to provide relevant answers. Over 80% of company know-how sits in the brains of its workers, companies are unable to use it to win business and don't have a system to provide insight to support decision making.

Starmind

Starmind creates an unrivalled insight into the knowledge of its employees by removing the need to curate and constantly update company knowledge bases. Starmind uses machine learning to capture and understand individual expertise, allowing teams to solve problems by receiving quality solutions, that employees trust.

Why customers use Starmind

- Trusted by Fortune 500 companies to deliver results in over 75 countries.
